

KC868-G smart gateway manual

- A. First, pls power the Gateway
- B. Download and install the APP

For Android phone

For IOS phone

1. Scanning the QR code to download and install the app accordingly.
 2. For apple phone, you can search "smart home" directly from Apple store.
 3. Register one account with 11 numbers (e.g.:20180518001) and setup the password
Pls don't forget the password (it's better to set an easy password)
- C. Login the APP, to click **【mine】** at the right bottom--then click **【Host Manager】** --then click **【add】** --click the QR code frame to scan the QR code, which is on the back of the gateway;
Give one name into the **【Device name】** --click **【add】** --finished.
 - D. Following, back to **【mine】** --click **【WIFI setting】** --input your wifi account and password--
Then click the reset key on the gateway--when the yellow light flashed--
click **【confirm connection】** in the APP.
At this moment, the red light of the gateway keeps on, then cut off the power and re-power
The gateway, the green light will turn on.(Internet connecting success)
(the lights perhaps change little slowly, pls wait for about one minute)

Now, you can check back to **【Host Manager】** to see that the gateway showing online.
 - E. Still at **【Mine】**--click **【Room】**--create and add room or floor, you can name them as wishing.
 - F. adding the wall light switches, still at **【Mine】** --click **【My device】** -- **【Unclassified】** you will find
Zigbee switch, click one you can control the matched light.
Then hold pressing the icon--click **【select room】**, name the lamp (e.g.: living room) and choose
room --then click **【save】**
Repeating the operation one by one-- then all the unclassified change into classified
 - G. login out the APP, and login in again, click **【Home】** -- you can find the light and remote control
them now.
